Profile

Senior Backend Engineer with 7+ years of experience building scalable Laravel-based systems across LMS, CRM, CMS, payments, and business operations. Skilled in backend architecture, async processing, MySQL optimization, and cloud infrastructure with AWS. Proven ownership of production systems with a focus on reliability, performance, and maintainability.

Core Skills

- Laravel
- MySQL
- GraphQL
- AWS
- PHP
- Vue.js
- REST APIs
- Payment gateway & SMS integrations

Professional Experience

2026 Jan – Present	Full-Stack Developer, Brndwrx Led development of a Laravel 12/Livewire/MySQL ISP operations portal for customers, leads, invoices, SMS, support tickets, and service workflows. Modernized legacy systems with automated data sync, migrations, queues, bulk SMS, imports, and invoice processing.	Bangkok, Thailand
2023 Dec – 2025 Dec	Senior Backend Engineer, Impulseinternational Led Laravel/MySQL backend development, migrated 1M+ assets and ~800GB from AWS to Azure with near-zero downtime, designed Azure Container Apps/Application Gateway infrastructure, and resolved critical production stability issues.	Yangon, Myanmar
2022 Sep – 2023 Aug	Full Stack Developer, WSmart (Lemonaide) Built and maintained Laravel/Vue.js CMS platforms and web applications, turning business requirements into tailored solutions while improving performance, responsiveness, and user experience.	Bangkok, Thailand

2018 Jan – 2022 Aug	Backend Developer, Bagan Innovation Technology Developed Laravel/MySQL APIs and backend systems for production workloads, supporting high-volume content, reporting, and transaction flows with a focus on reliability and data integrity.	Yangon, Myanmar
